Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/17/2007 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-3, 5-17, 19-25, and 27-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Note that claims 1-3, 5-17, 19-25, and 27-34 have been amended to define further that the hypotube has an outer diameter dimension to enable the therapeutic catheter to be advanced onto and along the guide wire which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-17, 19-25, and 27-34 are rejected under 35 U.S.C. 102(b) as being fully anticipated by Kimmell, Jr. (U.S. 3,952,747).

Note in figures 1, 4, and 5 of patent to Kimmell, Jr. shown a first hypotube member (22,48); a filter (10) coupled to the distal end of the hypotube member (22,48); a slave actuating member (30,32) comprises a second plunger, which coupled to the filter (10) and slidably mounted proximate distal end of the hypotube member (22) for longitudinal movement with respect to the hypotube member (22,48) and furthermore, wherein a master actuating member (first plunger 50) configured for longitudinal movement within the hypotube member (48) and hydraulically coupled to the slave actuating member (second plunger 30,32) (col. 7, lines 16-68).

Response to Arguments

Applicant's arguments filed 02/07/2007 have been fully considered but they are not persuasive. With respect to claims 1, 15, and 24, according to applicant, Kimmel does not teach or disclose that the plunger 50 is configured for movement within catheter 22. The examiner assumes that the applicant mischaracterizes the rejection as set forth in previous office action. It is clearly shown in figure 4 of Kimmel, where the

Art Unit: 3734

first plunger 50 is configured for movement within the hypotube (48) and NOT within catheter 22 as stated in applicant's remark. Furthermore, Kimmel's tube 48 is considered as a hypotube due to given its broadest reasonable interpretation. As to claims 2-3, 5-14, 16, 17, 19-23, 25, and 27-34, Examiner does not find these arguments convincing due to the rejection as state above. The Examiner disagrees with Applicant's remarks and has maintained the grounds of rejection under 35 U.S.C. 102 (b) as being anticipated by Kimmel for the reasons as set forth in the previous office action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin T. Truong whose telephone number is 571-272-4705. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 6:00 PM..
